Statement regarding REACH conformity Unipol grades

Unipol Holland BV is aware of and working conform the (EC) Regulation 1907/2006 (REACH).

We confirm that our EPS grades "UNIPOL ECOFREPS" and "UNIPOL R-EPS" are considered mixtures under REACH and that all substances contained in these products are registered under REACH or exempted for registration.

We are continuously monitoring that "UNIPOL ECOFREPS" and "UNIPOL R-EPS" do not contain any substances listed on the REACH Candidate List of Substances of Very High Concern (SVHC) for Authorization in individual concentration equal or higher than 0,1% by weight. Candidate List of SVHC can be found at the ECHA website (<https://echa.europa.eu/nl/candidate-list-table>).

We would like to inform you that as of June 27th, 2024, the European Chemicals Agency (ECHA) has identified Bis(α , α -dimethylbenzyl) Peroxide (DCP) as SVHC due to its known and previously communicated reproductive toxicity. In compliance with REACH, we like to inform you that at the moment both Unipol grades can contain more than 0,1% by weight of this SVHC substance: "UNIPOL ECOFREPS" (<0,3% DCP w/w) and "UNIPOL R-EPS" (<0,2% DCP w/w).

UNIPOL is finalizing the process of changing its production process to reduce the DCP concentration in both grades below the 0,1% (w/w) and is expecting to be able to supply our revised Unipol grades before the end of 2024.

We will then update our product safety data sheets (SDS) accordingly and keep you informed.

Please do not hesitate to contact us with any question on the information provided herein (algemeen@unipol.nl).
